

GROUND HOE

TORO LOCO

ZH - ZEP

ZH - It can be applied to different models of excavators, allowing for excellent soil loosening. Thanks to its robustness and the quality of the materials it is made of, it is possible to work in fairly rough conditions. Its main feature is the ability to work the soil without compacting the ground beneath the working area, ensuring that different types of plants can be sown in soft, well-aerated soil even at greater depths.

ZEP - Robust and compact machine with small dimensions and also suitable for excavators from 1.5 - 1.6 tons up to 3.5 - 4.0 tons. A very important feature is that it works the soil with straight hoes leaving the worked soil soft. This allows different types of plants to be sown in soft, well-loosened soil, even at greater depths.

Model		Weight	Working area		
Code	Ton	Kg	mm	l/mm	BAR
ZH	1,7 – 3,5	150	200x730	25 – 30	200
ZEP	1,7 – 3,5	80	Ø 400	25 – 30	200
