

# ASPHALT CUTTING DISC

**DVM**
**TORO LOCO**

Diamond disc for cutting asphalt and concrete, compatible with mini, midi, and excavators from 1.5 to 6.0 tons. The standard disc is designed to work on a wide range of materials: bricks, granite, natural stone, porphyry, refractories, various types of concrete, and asphalt. If needed, or to adapt to different surfaces, it can be easily replaced with discs designed for other specific materials.

- The disc is equipped with a fully adjustable protective cover, ideal for working in complete safety.

Its robust and compact structure, combined with the special mounting system, allows work at variable angles, easily adapting to irregular surfaces or obstacles. Thanks to the water-cooling system, the unit maintains optimal operating temperature even during extended cutting on asphalt or concrete.

- The motor and valve group are flange-mounted to ensure full control of the attachment.

Model	 Oil	 Pressure	Maximum cutting depth	
-------	--	---	-----------------------	--

Code	l/min	BAR	BAR	Ton
<b>DVM2</b>	20 – 30	200	320	1,5 – 2,5
